

Medication Safety Is In Store For You

Want practical solutions? The Institute for Safe Medication Practices (ISMP) offers a variety of customized risk assessments that can help your community/retail pharmacy quickly address specific medication safety challenges. It's cost effective. It's time effective. And best of all you get input from some of the nation's leading safety experts.

Have an ISMP Medication Safety Risk Assessment and focus in on some of your key safety questions. As little as one day can make a huge impact.

Q: Why ISMP?

A: ISMP has more than 35 years of experience, as well as operation of the nation's only voluntary medication error reporting program, and can offer solutions based on unique, in-depth knowledge of medication errors and their causes. ISMP has assisted healthcare organizations and retail pharmacies around the country, and can provide facilities of all sizes and settings with evidence-based prevention strategies and best practices.

Q: What Is Included?

A: Individualized ISMP analysis and support to address virtually any medication safety question or problem. Whether you are looking for new ideas to improve safety in specific dispensing areas, contemplating the addition of new technology, tackling a difficult or new safety issue, or want to better analyze and use your existing error reporting data, ISMP can help.

Q: How Long Does It Take?

A: One to two days onsite — an efficient use of your time for maximum results. ISMP Experts will work collaboratively with your staff to problem solve and provide the impetus to transform your medication safety practices.
